

# HYDRAULIC SPOTTING PRESSES

# EAGLE PRESS

*& Equipment Co. Ltd.*

**PH2-400-120-96**

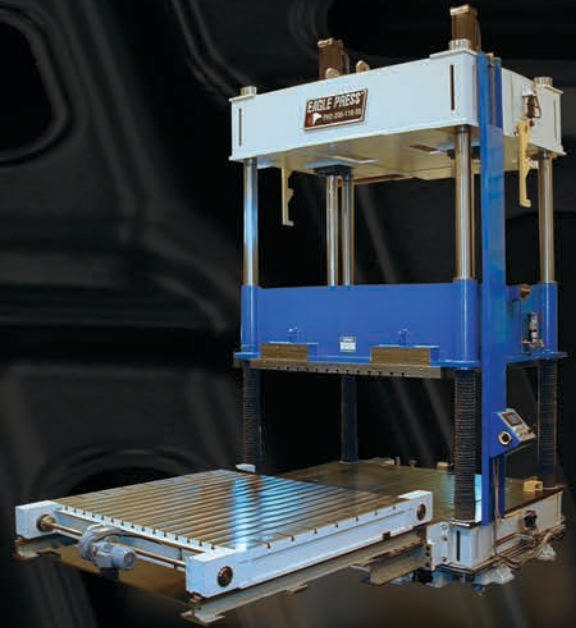

All Eagle presses are constructed using heavy duty steel plate fabrications and are engineered for optimum frame rigidity.

Standard features include centralized lubrication, intuitive PLC controls and crown-mounted manifold based hydraulic systems.

Options include rolling bolsters, pivoting upper platens and a variety of slide locking devices.

Eagle tryout & spotting presses are fast, easy, safe, state-of-the-art hydraulic presses for injection and compression molds, diecast and/or stamping dies.

These rugged machines are available in both post-type or straight-sided, gib-guided frame construction.

**PH2-200-110-98**

These machines are available in a range of tonnage capacities up to 3000 + tons.

Bed areas, stroke lengths and shut heights are custom tailored to meet your specific requirements.

**PH2-200-130-66**
