

PRESSES
MECHANICAL & HYDRAULIC

*Straight Sided Double Crank
Mechanical Presses*

MAX 2 Series
200T - 630T

Safeties conform to:
CE (EN-16092 : 2018)
OSHA 1910.217
CSA-Z142
NR-12

ISO 9001:2015
ISO 14001:2015
OHSAS 18001 :2007

Cost Effective Stamping Solution

Ideal for Progressive Operations • Suitable for Forming, Punching & Blanking

Accurate Stampings & Enhanced Die Life • Prompt Local Service Support

Ideal for Progressive Operations

Wide side opening enables automated feeding of coil and blanks to produce long length & narrow width components through progressive feeding.

315 T MAX 2L Press supplied for Progressive Die Application

Eccentric Load Bearing Capacity

High eccentric load bearing capability due to wide space between suspension points, extra rigidity and long slide height helps in producing asymmetrical components.

Safety of Machine & Die

Hydraulically operated fast acting mechanism mounted under each suspension, senses the application of load beyond capacity of each suspension, and thereby prevents damage to Press and Die by quick stoppage.

Precise and Vibration free Transmission

Crank Shaft

Forged from Normalized Alloy Carbon Steel, Ultrasonically Tested.

CAD analysis ensures elimination of stress concentrations and metal fatigues.

Gear

Gears of drive train machined to precision grade, conforming to DIN Grade 7 or AGMA 10 and better, for smooth torque transmission and vibration free operation.

Pinion

Forged Alloy Steel, Hardened & Tempered, Ultrasonically Tested, Accurately Machined and Ground.

Connecting Rod

Steel Casted, Normalized and Ultrasonically Tested.

Flywheel

Dynamically balanced Flywheel for long life of bearings.

Force vs Stroke Curve (MAX 2L)

MAX 2L

- High Speed and Production
- Ideal for Coil feed and Progressive work

MAX 2H

- High Work Energy
- Enhanced Die Cushion Capacity
- Forming Capability
- Ideal for Transfer work

MAX2 Series Presses are easy to interface with various automation equipment like Transfer, Coil Feed Line etc.

Further, our experienced team can help you to select a press suitable for your stamping requirements and application.

Force vs. Stroke Curve (MAX 2H)

Velocity vs Stroke Curve

Slide Velocity Calculation

Machine SPM = R

Stroke Length = L (mm)

Distance fbos = d (mm)

V_a = Slide Velocity at distance fbos d (mm/s)

$d_0 = 100 \times d/L$ (%)

V_{10} = See chart according to d_0 (mm/s)

$V_a = V_{10} \times R \times L/1000$ (mm/s)

Example:

Machine SPM = 20

Stroke Length = 300

Distance fbos = 90 (mm)

V_a = Slide Velocity at distance fbos 90 (mm/s)

$d_0 = 100 \times 90/300 = 30$ (%)

V_{10} = See chart according to 30% = 50 (mm/s)

$V_a = V_{10} \times R \times L/1000 = 50 \times 20 \times 300/1000 = 300$ (mm/s)

High Precision

Precision machined 8 point extra long guide for precise Slide movement, conforming to JIS 6402 B Grade-I for geometrical accuracies.

High Rigidity

Frame & Slide fabricated from tested Steel Plates and stress relieved, to ensure fatigue-free long life of the frame.

Fatigue life of stress relieved Press structure verified using Finite Element Analysis to ensure maximum rigidity for accurate stampings & enhanced die life.

Safety of Operator

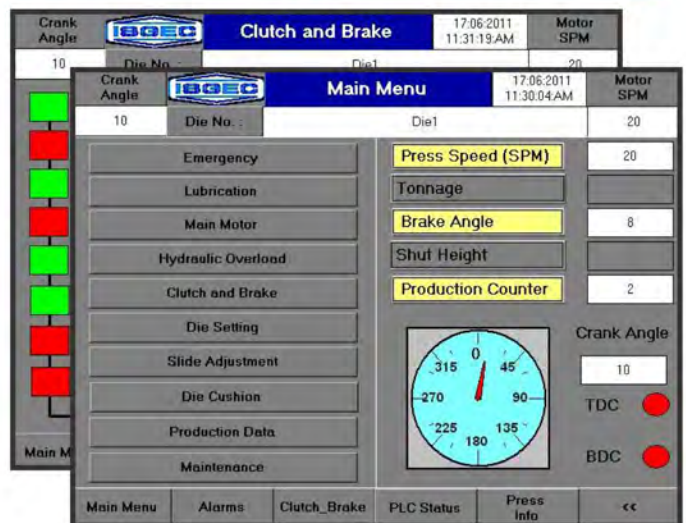

Press is equipped with dual safeties in control systems with monitoring of redundancies.

- Dual safety valve provided for Clutch and Brake actuation for dual redundancy of the system.
- Anti repeat circuit with dual circuit.
- Emergency stop buttons on panel and run button station.
- Two hand Run Button Station.
- Photoelectric Safety Guards (Optional).
- Compliance with CE/OSHA safety regulations provided on demand.

CE Safety Certificate

User Friendly Operator Interface

- Programmable Logic Controller with user friendly operator interface through HMI screens with Diagnostic feature.
- Ergonomically designed HMI Screens developed after practical feedback from the Press users.
- Screen Navigation with soft keys.
- Status & Alarm display for ease in operation.

* Optional features

Single stroke working is recommended up to mid SPM only.

Machines are manufactured as per SI Units. Dimensions in FPS are approximate and given only for reference.

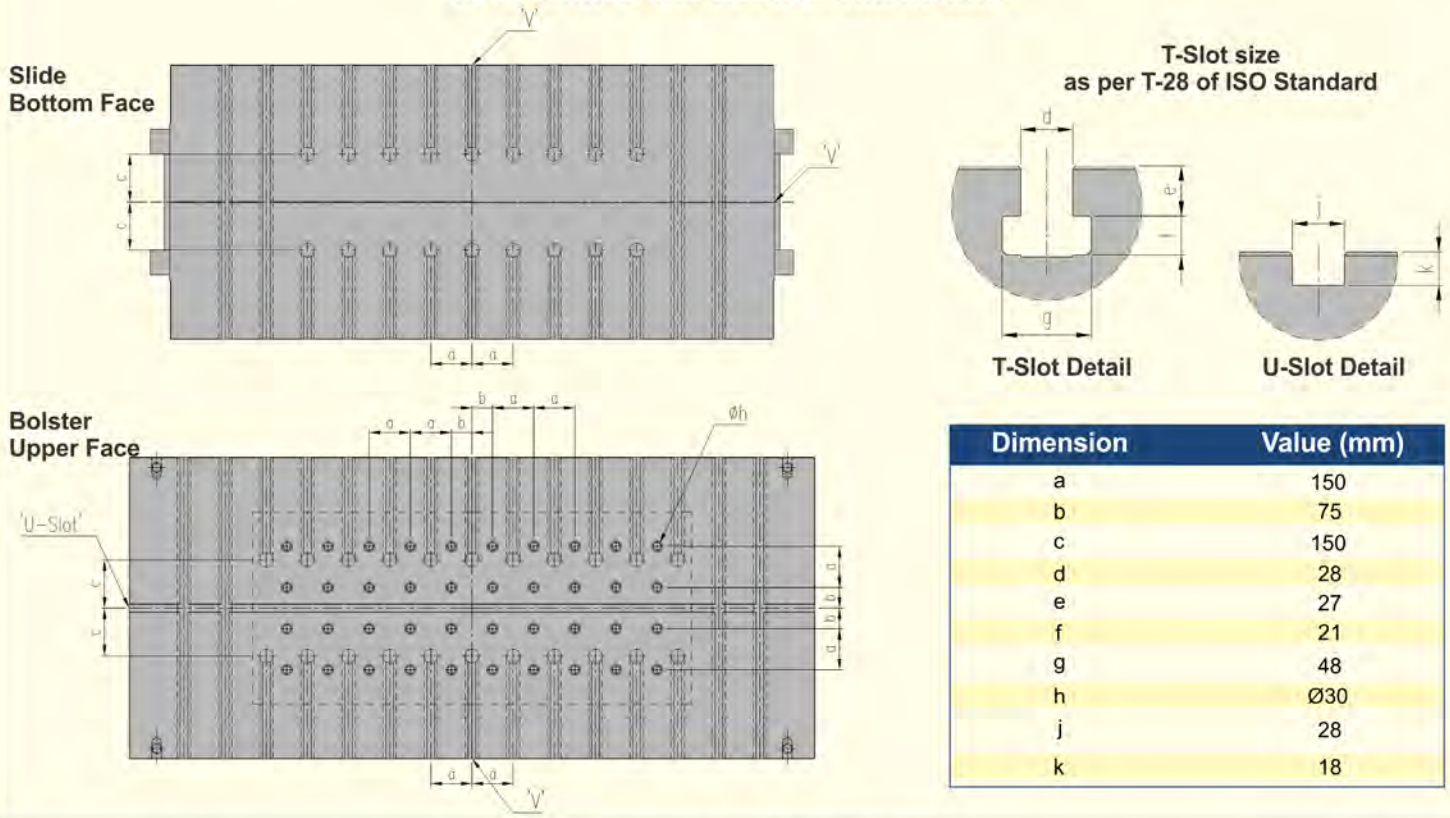

Standard Accessories

- Pneumatic Counter Balance Cylinder
- Hydraulic Overload Protection
- Motorised Slide Adjustment
- Automatic Forced Lubrication
- Programmable Logic Control
- Pneumatic Clutch & Brake
- Emergency Stop buttons
- Die Height Indicator
- Portable Two Hand Operator Stand
- Production Counter
- Dual Safeties
- Die Area Light
- Safety Block
- Photo Electric Guards

Optional Accessories

- Pneumatic Die Cushion
- Tonnage Monitor
- Quick Die Change System
- Anti Vibration Mounts
- Interfacing provision with coil feeding system
- Variable Speed through AC Inverter
- Mis-Feed Detection
- Safeties conform to CE/OSHA
- Die Protection System
- Mechanical Knock Out
- Wet Clutch

MAX 2 Slide and Bolster Dimensions

Wide Range of Presses

Servo Presses • Transfer Presses • Progressive Presses • High Speed Presses • Hot Stamping & Hot Forming Hydraulic Presses
 Standard Straight Sided Mechanical & Hydraulic Presses • Blanking Lines • Tandem Press Lines - Mechanical & Hydraulic
 Cold Forging Presses • Tryout & Die Spotting Presses • Gap Frame & Ring Frame Power Presses • Special Purpose Presses
